Current Position

Carnegie Mellon University, Machine Learning Department, Pittsburgh, PA — 07/2024 - present
Postdoctoral Researcher, Supervisor: Pradeep Ravikumar

Education

Rensselaer Polytechnic Institute, Troy, NY — 05/2020 - 05/2024
Ph.D. in Electrical Engineering, Advisor: Ali Tajer
Dissertation: Causal Learning via Interventions: Estimation and Design

Rensselaer Polytechnic Institute, Troy, NY — 08/2018 - 05/2020
M.S. in Electrical Engineering

Bogazici University, Istanbul, Turkey — 09/2013 - 06/2018
B.S. in Electrical & Electronics Engineering

Research Interests

My research centers on the intersection of causality and machine learning. The overarching goal is to develop a methodology that models our world through a causality lens, capitalizing on shared causal mechanisms across diverse data environments. To achieve this, I use the language of *causal interventions* in a wide range of problems, including but not limited to unsupervised representation learning, causal structure learning, and the design of sequential interventions. More recently, my emphasis has been on **causal representation learning** from interventions, and more generally, **identifiable representation learning.**

Research Experience

Causal Representation Learning from Interventions

- Designed a novel framework for analyzing causal representation learning via score functions under interventions. Established identifiability results along with provably correct algorithms.
- Published our results for general transformations at [AISTATS-2024]. The manuscript for the results on linear transformations is under revision for JMLR, and an earlier version – one of the first papers on interventional CRL – is available in arXiv. The paper on multi-node interventions is published at [NeurIPS-2024]. The first paper on the sample complexity of interventional CRL is also published at [NeurIPS-2024].

Intervention Design via Causal Bandits

- Designed causal bandit algorithms with relaxed assumptions compared to the prior work. Established upper and lower bound regret guarantees for both static and time-varying systems. Published papers at [JMLR-2023] , [JSAIT-2024], and [ISIT-2024].

Scalable Interventional Structure Learning

- Developed consistent algorithms for efficient learning of intervention targets and improving the structure learning of causal graphs. Published papers for causally sufficient [NeurIPS-2021] and causally insufficient models [UAI-2022].

Structure Learning of Undirected Graphical Models

- Developed algorithms for structure learning of shared subgraphs for multiple undirected graphical models, and analyzed sample complexities. Published results at [AISTATS-2021].

Professional Experience

Visiting Research Scholar at MIT-IBM Watson AI Lab — Cambridge, MA
Mentors: Dr. Dmitriy Katz-Rogozhnikov, Dr. Prasanna Sattigeri, Dr. Dennis Wei — 09/2022 - 12/2022

Designed a framework for the causal discovery of a mixture of DAGs and established identifiability conditions, published the results at [TMLR-2024]. Established the necessary and sufficient conditions for interventional causal discovery in mixture models and designed efficient algorithms, published at [NeurIPS-2024].

The Rensselaer-IBM AIRC Collaboration
AI Horizons Extern, Mentors: Dr. Prasanna Sattigeri, Dr. Karthikeyan Shanmugam 05/2020 - 08/2020

Researched on combining the causal discovery process with generative modeling and inducing a latent space representative of the underlying structure.

Speech Enabled Smart Technologies Istanbul, Turkey
Research Intern 06/2017 - 08/2017

Built neural networks for a speaker identity verification system.

Undergrad Research

Boğaziçi University Signal and Image Processing Laboratory Istanbul, Turkey
Senior Design Project, Advisor: Prof. Murat Saraclar 10/2017 - 05/2018

- Investigated deep learning techniques for Query-by-example speech search on low-resource languages.
- Completed Bachelor thesis titled "Query-by-Example Speech Search with Neural Networks".

University of Wisconsin-Madison Madison, WI
Undergraduate Research Assistant, Advisor: Dr. Xinyu Zhang 05/2016 - 07/2016

- Researched on tracking the orientation of batteryless objects via RFID tags.
- Analyzed characteristics of frequency channels to integrate localization to Gyro in the Air project.

Talks

Carnegie Mellon University - Statistical & Symbolic Learning Group 2024
Score-based Causal Representation Learning from Interventions

Causal Representation Learning Workshop at NeurIPS 2023
Score-based Causal Representation Learning from Interventions

IBM Causal Reinforcement Learning Group 2023
Causal Bandits for Linear Structural Equation Models

Awards & Honors

Allen B. Dumont Prize 2024

NeurIPS Top Reviewer 2023

UAI Top Reviewer 2023

Jerry Dziuba ECSE Graduate Student Service Award 2022

Belsky Award for Computational Sciences and Engineering 2022

The Rensselaer-IBM AI Fellowship 2020-2024

Undergraduate Science Fellowship of Government of Turkey 2013 - 2018

University Entrance Exam - Ranked 276^{th} out of 1.8 million candidates 2013

Turkish National Mathematical Olympiad - Silver Medal 2012

International Balkan Mathematical Olympiad - Silver Medal 2012

International Junior Balkan Mathematical Olympiad - Gold Medal 2010

Teaching Experience

Guest Lecturer, Carnegie Mellon University Pittsburgh, PA
Machine Learning 10741: Representation Learning November 2024

Teaching Assistant, Rensselaer Polytechnic Institute Troy, NY
ECSE 2410: Signals and Systems Spring 2020
ECSE 2610: Computer Components and Operations Spring 2019
ECSE 1010: Introduction to Electrical, Component and Systems Engineering Fall 2018
